---

As a French manufacturer of bathroom fittings and accessories, THG Paris evokes both master craftsmanship and industry at its highest level. We have been imagining, developing and manufacturing our products since 1956.

For over 60 years, with its unique expertise, THG Paris offers exceptional collections of bathroom fittings, bathtubs and accessories, thereby enhancing bathroom design and offers models of bathroom fittings in very different styles. Both aesthetically pleasing and of high technical quality, THG Paris products comply with the requirements and standards prevailing in all countries around the world.

Through our Stock Program, discover a selection of collections and products available only in chrome finish (A02) and shipped within 10 days upon receipt of order.

# BELUGA

---

A perfect illustration of elegance through sobriety, the Beluga series is anchored in a resolutely contemporary style for which THG Paris is less known. The permanent co-existence of round and square shapes softens the dominant metal characteristic of these bathroom fittings.

# COLLECTION «O»

---

The famous ring designed by Andrée Putman for Christofle in 2002 is neither really round, nor oblong, twisting on the flat and rounded effect. It is the perfect embodiment of modern luxury. It is now being introduced into the intimate environment of bathrooms, embellishing basins, bathtubs and various fixtures. By combining the talents of Christofle, Studio Putman and master tap maker, THG Paris, the sensual curves of the - O - Collection evoke the movement of water.

# LE 11 À MANNETTES

---

It is through working on joint projects, such as luxury yachts and prestigious villas that THG Paris, a French top-end taps and bathroom accessory manufacturer and the well known interior designer, Alberto Pinto crossed paths. Delighted to be part of this adventure, Mr Pinto, who is always on the look out for new challenges, offered to create a range of taps and fittings for THG Paris. Alberto Pinto has created an exclusive range with flowing lines and a sophisticated design entitled “Le 11 by Alberto Pinto”, evoking the mythical address of the town house located in central Paris - just a stone’s throw from the Place des Victoires where Pinto has set up his interior design and decoration studio. A water blade flows from the nozzle, forming a perfect and harmonious straight angle.

ART DÉCO

---

Travel through time for this collection. Art deco in name and in inspiration, the artistically rich movement that THG Paris has drawn on for the design of this collection combines utility with purely decorative forms. The Art Deco collection conveys a timeless, international spirit.

# DEAN

---

Studio THG Paris puts its mark on Dean, a collection of bathroom fittings and accessories with graphic and masculine lines, the details of which contribute to the vintage design of the set.

The simplicity of the spout contrasts with the aesthetics of the braces, with delicate and natural curves. With its remarkable contours, this metal fitting recalls an industrial spirit, which is softened by the roundness of the handle. Dean adapts to contemporary bathrooms as well as to a more retro atmosphere.

# FAUBOURG

---

This series, conceived by designer Pierre-Yves Rochon, is the perfect illustration of classicism, with a twist of the paradoxical in its at once sharp and slender metal lines. In the shapes chosen and materials used, Pierre-Yves Rochon and THG Paris have created a complete and varied bathroom fittings design.

Synonymous both with «French chic» and purity, Faubourg gives a discreet but effective touch to every bathroom decor.

**SPIRIT**

---

With an industrial and minimalist spirit, this collection aims to offer practicality and ease-of-use. Entirely in metal, with engraving, this timeless design is reminiscent of the bathroom fittings of the past, while its attention to detail takes us to the United States, the birthplace of this «transitional» style. The Spirit collection gives solid value for all bathrooms.

# TRADITION À MANETTES

---

Halfway between the Art Deco and Charleston collections, the Tradition series is positioned as a valuable piece of art, almost akin to jewellery. With its plugs, its multi-faceted diamond-shaped sides and three versions, one of which includes a crystal insert, this collection offers a varied range of retro styles.

## STANDARDIZATION AND ENVIRONMENTAL COMMITMENT

### NOMENCLATURE OF STANDARDS FOR EACH PRODUCT REFERENCE

/US = USA

/W = WRAS

The products are normalized according to the country code, for example: 151/US for USA or 151/W for United Kingdom. In United Kingdom if the product is not normalized, the standard code is used (eg 112BSG/W if normalized - 112BSG if not).

### PRODUCTS MANUFACTURED IN COMPLIANCE WITH INTERNATIONAL TECHNICAL AND WATER POTABILITY CONSTRAINTS

With regard to potability, the components used in the manufacture of THG Paris fittings comply with both the 4MS (Acceptance of Metallic Materials Used for Products in Contact with Drinking Water), the WRAS (United Kingdom standard), the ACS (France standard), NSF6109 (USA standard) and AB1953 (California standard).

Technically, THG Paris certified NF, CUPC, DVGW or SVGW products ensure durability and comfort of use, controlled acoustics and the assurance of products tested by independent laboratories.

THG Paris fittings can also be delivered in accordance with BREEAM or LEED HQE certifications.

### BRASS, A RECYCLABLE MATERIAL

As a producer, THG Paris controls the entire production line of fittings, from foundry to surface coating. We have long established sorting and recycling of 100% brass.

Recycling is done in partnership with our metal suppliers in order to perfectly control the composition of the alloys we use in our products. These alloys meet strict standards. In parallel, all the metals used (stainless steel, steel, aluminum...) by THG Paris are also recycled.

In addition, in order to improve the quality of our fittings and meet the most stringent standards, THG Paris uses exclusively lead-free brass from France and Germany.

## STANDARDIZATION

### US CODE COMPLIANCE

Our products sold in the US market are made in compliance with the requirements of applicable standards. They are regularly tested by independent laboratories so as to guarantee our customers ongoing compliance. THG works with the NSF and IAPMO labs to ensure compliance with standards NSF 61s9, ASME A112.18.1-2005/CSA B125.1-05 and CA law AB 1953.

Standardization characteristics

To guarantee that our products comply with applicable US standards, they are tested for a number of criteria: water flow, comfort, wear and compliance in terms of drinking water distribution.

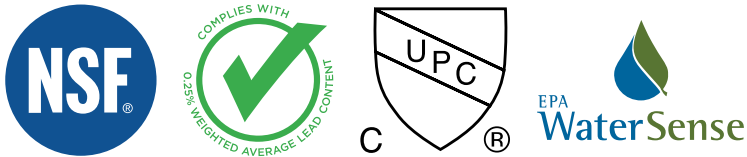

### WATER FLOW

This is the maximum flow rate for running water. This characteristic is measured by calculating the water flow per minute. This measurement is expressed in gallons per minute (gpm). For washbasin and sink faucets, the default standard corresponds to 2.2 gpm and for showerheads, it is 2.5 gpm. On request, THG can also supply products compliant with water saving standards as defined by the WaterSense label which calls for a maximum flow rate of 1.5 gpm.

### COMPLIANCE IN TERMS OF DRINKING WATER DISTRIBUTION

So as to comply with CA law AB 1953 applicable in the State of California, which regulates the use of lead, we use lead-free brass to make our faucets destined for the Californian market. To further our quest for compliance, we have decided to eliminate the use of lead in all of our faucets destined for the US market.

So as to guarantee our customers that our products are made in line with applicable standards, we have set up a Department within THG to ensure on-going compliance with these standards.

## ENVIRONMENTAL POLICY

### **BATH & ART DE VIVRE**

Fashion, Craftsmanship, Innovation and Responsible Manufacturing

THG is world renown for creating some of the most exquisite examples of bathroom fixtures and hardware ever imagined. Our passion for meticulously crafting the finest materials into works of art carries over into everything we do. Bath & Art de Vivre, “art to live,” has deep meaning and conviction beyond the end product that we produce; we consider it our responsibility to take action in order to reduce the environmental impact our activities might have.

### **ENVIRONMENTAL MANAGEMENT SYSTEM:**

Over 10 years ago, THG began the processes of updating our manufacturing facilities and management guidelines while implementing and applying the following environmental policies:

Observe prevailing environmental laws

Stay focused on the action of reducing the environmental impact of the company’s activities in everything that we do

Maintain an ecological approach to the conception of new product development and expansion

### **OUR FACTORY AND FACILITIES REFLECT THG’S COMMITMENT TODAY AND WELL INTO THE FUTURE:**

New facility adding 35,000 sq. ft. constructed in accordance with RT 2500 standards (Thermal Regulation) utilizing architectural designs, engineering and materials to minimize energy consumption.

High efficiency lighting installed in 48,000 sq. ft. of facility and power grid management system allows for a reduction of more than 50 percent of electric consumption via Gradual Power Supply Technology.

Solar Energy and a 19,000 sq.ft. photovoltaic plant add to THG’s list of sustainable development actions taken to harness renewable resources. This is achieved by taking advantage of the building’s elongated roof surfaces. The production of electricity is achieved in a silent, autonomous manner that is greenhouse-gas-emission free and non-polluting. THG has entered into a partnership agreement on energy consumption reduction with ADEME, an agency for sustainable energy and environmental development located in France.

Reclamation and Non-Hazardous Industrial Waste is achieved with the latest techniques

and treatment procedures such as: the plating of finishes with zero water waste; relying on a drastic reduction of chemical product consumption while maximizing water recycling. (This process reduces water consumption by 80 percent). Air quality is maintained by capturing carbon emissions and “cleaning” of emitted gases created during manufacturing. In addition, once industrial water is used, it is collected and treated in our own plant and recycled back into the closed loop circulation system.

Recycling is achieved across all levels of operation at THG. In the manufacturing process, recycling is done in conjunction with our metal suppliers. Brass is the quintessential recyclable material and allows a 100 percent full cycle program. We work extremely close with our vendors to be sure that the raw material that we are working with meets our stringent standards in terms of the perfect alloy compositions required for our foundry and machining. THG also recycles all of its other metals, including inox, aluminum, copper and others. A full recycling program is in place throughout all facilities to include generalized waste sorting of consumables, plastics, cardboard, and organic matter. Waste collected is transformed into other products through a third party.

THG brings luxury, quality and peace of mind to our clients. In doing so, we use lead-free brass in all of our products. Water conservation is a standard amenity on all THG lav faucets, shower heads and hand showers. These products are equipped with code approved water restrictors that do not hinder their performance.

## GENERAL SALES CONDITIONS

THG warrants to the purchaser or homeowner all plumbing and accessory products sold by THG USA, to be free from manufacturing defects in materials and workmanship. THG limits this warranty for a period of five years from the date of delivery. THG warrants its products against mechanical failure for a period of five years. Finishes are warranted for a period of one year, with the exception of polished chrome, which is warranted for five years. Any defects in finish will usually appear within the first weeks of use. Proof of purchase (original sales receipt) from the original purchaser must accompany all warranty claims.

### REPAIR OR REPLACEMENT

If within the applicable warranty period the covered products shall be proved to the satisfaction of THG to be defective, THG will repair or replace such products, at its expense (provided that such repair or replacement shall not include installation costs). THG's obligation shall be limited to such repair and replacement and shall be conditioned upon THG's receiving notice of any alleged defect within the applicable warranty period. (Purchaser shall be responsible for all shipping charges for returned products.)

### LIMITATIONS ON WARRANTY COVERAGE

Warranties do not cover installation or any other labor charges, and do not apply to:

Products that have not been installed by a licensed plumbing contractor;

Products subject to normal wear and tear;

Products which have been repaired, altered or modified in any way by purchaser or any person, or not using THG service parts;

Products which have not been installed, used, maintained or stored in accordance with the instructions provided to purchaser by THG USA;

Products which have been used for purposes other than or in a manner contrary to their intended and normal use; products that have been used outdoors;

Products which have been damaged as a result of misuse, negligence, freezing, accident or faulty installation or maintenance;

Products damaged by the effects of dirt, foreign bodies carried by water (sand and debris), salt water air, hard water, lime scale, or abrasive or aggressive cleaners;

Products sold "as is" from dealer or showroom displays.

Products purchased from any source other than a THG USA authorized dealer/showroom, or purchased via the internet.

### CARE AND CLEANING OF METAL FAUCETS AND FITTINGS

THG recommends following the care and cleaning guidelines as set forth by the DPHA (Decorative Plumbing & Hardware Association). Below is an overview of those guidelines; for complete instructions and product recommendations please refer to the DPHA Care and Maintenance brochure.

For all finishes: to prevent water spots, wipe off water with a clean, soft, damp cloth after each use. NEVER use an abrasive cleaning product, cleanser, ammonia-based cleaner, harsh chemicals or bleach. Use a mild ph-neutral soap mixed with water for regular cleaning.

Uncoated polished finishes: includes polished chrome (A02), polished nickel (B01), polished silver rhodium (F18), light gold (F30), gold polished (F01), nickel antique (H28), polished unlacquered brass (C27), polished black nickel (D24) a mild metal polish can be used to remove light oxidation. Faucet wax should be used after polishing to prevent oxidation.

Uncoated matt finishes: chrome matt (C02), light gold mat (F31), light gold satin (F32), nickel matt (C01), nickel satiney (C05), gold matt uncoated (F07), silver matt rhodium (F19) etc. These finishes will oxidize and darken over time. To reduce oxidation, use a faucet wax on a regular basis.

Coated (lacquered) finishes: silver polished antique (H03), silver antique matt coated (H08), bronze clear uncoated (D01), bronze matt coated (D05), red copper polished coated (H01), red copper antique coated (H24), etc. wax monthly with a faucet wax designed for use with lacquered finishes.

Living finishes: bronze satiney (H27), oil rubbed bronze natural (D21), oil rubbed bronze US (D10), etc. finishes will vary in color and darkness, changing with time. "Renaissance Wax" can be applied to uncoated oil rubbed bronze finishes to darken the bronze and reduce wear on finish.

In addition, for a deep clean and to remove residual or corrosive markings we recommend a monthly application of the following THG cleaning products:

Renov'rob: for use on chrome and nickel finishes. This wax and organic soap based cleaner, applied and removed with a nonabrasive soft cloth, creates a protective wax-film which enables the fittings to be polished and produces a lasting brightness.

Brillor: for use on gold, light gold and satin finishes. This fatty-acid soap and micro-granules of organic content, applied and removed with a non-abrasive soft colth, creates a protective wax film which enables the fittings to be polished and produces a lasting brightness.
