Water, wellness in its beginnings

The first person to understand the potential of water was the Greek philosopher Thales who saw water as a primordial element, the origin of all things. But it was the Romans who first put into practice the benefits that water gave to the body and mind and who introduced bathing as a refined daily activity. Numerous thermal spas were built throughout the empire, offering wellness enhanced by marble and mosaics. The Middle Ages was a dark period in which the pursuit of wellness was considered a sin, but between 1700 and 1800 hydrotherapy stations began to flourish again, places in which the bourgeois nobility spent their free time. Water became synonymous with health and the most diverse practices were created to deliver a range of targeted benefits, from thalassotherapy based on the use of sea salt, to the alternating of hot and cold water. The turning point was at the end of the 19th Century in Germany with the industrial production of enamelled cast iron bathtubs which was followed by the evolution that led to baths with integrated hydrotherapy systems, patented by Jacuzzi®.

To create is to dream. This is how Jacuzzi® was born

Each of us has a dream. The history of Jacuzzi® began here. From the creativity, the energy, the ability to anticipate what people's dreams will be. And then, make them come true. Over a century ago, Francesco, Rachele and Valeriano Jacuzzi, left Italy to seek their fortune, and headed for California. Within a few years, Gelindo, Candido, Giocondo and Giuseppe had joined them to found Jacuzzi Bros. The year was 1915 and a story that was out of the ordinary was beginning to take shape, the result of ability and resourcefulness, ingenuity and innovative spirit.

The first invention was a new concept for propeller design adopted by the United States Air Force, prologue of the first enclosed cabin monoplane patented in 1920. From here, a series of insights would open up new perspectives. From the invention of an irrigation pump that was a huge success with American farmers, to the creation of the Frostifugo, a high powered fan that blew warm air over crops to combat frost.

Each idea led to another idea. Until 1956, when Candido made a virtue of necessity. In order to relieve the pain from the severe rheumatoid arthritis of his youngest child, he created the first submersible pump for the bathtub. The J-300® was born, a jet pump that synthesizes the curative effects of hydrotherapy. 1968 was the year of change. Candido's design was reworked by his nephew Roy, who designed a bath with integrated jets and a hydromassage system. The basis of every Jacuzzi® model.

From this point the story tells of evolution and steady growth aimed at wellness for people. A model that has overcome geographical boundaries, but remains firmly anchored to the roots and the innovative spirit that still remains the most important asset of the Jacuzzi® brand with its more than 250 international patents, it is an example of excellence in the development of technologically advanced products with unique design.

10 reasons to choose Jacuzzi®

1. More than 50 years experience

Jacuzzi® has been producing hydromassage baths and showers since the 60s. It was the Jacuzzi brothers who designed and launched the first whirlpool bath. Since then, Jacuzzi® technicians have patented hundreds of designs and innovative products. Our experience in hydromassage and the love for hydrotherapy allows us to stay one step ahead, improving every day and giving life to new ideas, thanks to the help and advice of our customers.

2. Hydromassage carried out to perfection

The Jacuzzi® hydromassage is unique: the careful work that combines technology, ergonomics and design, produces a beneficial effect that is still unmatched.

The positioning of the nozzles at 30°, with jets that can be positioned in any direction, allows all the muscle groups to be included and offers an effective, deep and healthy hydromassage. Jacuzzi® baths have 4 types of hydromassage: Classic, Aquasystem, Shiatsu, Air. Jacuzzi® has also designed and produced the vertical hydromassage, offering the benefits of hydrotherapy in the shower as well.

3. A unique construction system

Superior in terms of sturdiness, thanks to a structure reinforced with a robust metal frame, Jacuzzi® baths have the ideal inner depth and are equipped with a hydraulic self-draining system. Each bath is fitted with a Dry Run Protection device, which prevents the pump from operating when the bath is empty or has an insufficient water level. The high power of the pump, is such as to ensure intense and effective jets, and strong controlled water circulation. With the nozzles fully closed, it allows the bath to be used without hydromassage, ensuring maximum hygiene.

4. A name you can trust

Jacuzzi® is the name of a brand, but you must have heard a whirlpool bath referred to with this name. It's common to associate the term "whirlpool bath" to the name of our brand because in the minds of the consumers we are the only ones who exist. Discovering that we are a brand that bears the name of a family is a nice surprise for many people. Our name is synonymous with reliability.

5. Wellness for the whole family

Enjoying quality time and taking care of yourself is among the main benefits. Joking and chatting with loved ones, immersed in a Jacuzzi® bath, taking a break in a shower cubicle with hydromassage and steam bath, away from the pressures of everyday life is good for your health and life. The regular use of a Jacuzzi® bath or shower invigorates for the whole day. Regular use leads to better circulation by increasing the blood flow in any part of the body. A healthy body is energetic and active, and choosing Jacuzzi® can be essential for maintaining a healthy lifestyle for all the members of your household.

6. A Jacuzzi® product is beautiful

Jacuzzi® has always been a pioneer in aesthetics: we design and develop our products working with the greatest Italian and international designers. This means that the best in domestic hydromassage technology produces its highly effective results in models with modern design, in line with the latest trends of contemporary furnishing.

7. Jacuzzi® products last for years

Looking inside a Jacuzzi® whirlpool bath or steam and shower cabin is like taking a look under the bonnet of a luxury car. The Jacuzzi® manufacturing components are without doubt the best on the market. We do not compromise when it comes to quality because it is the foundation for maximum durability and reliability of the product. Jacuzzi® products are not only long lasting, but also offer the best quality/price ratio.

8. Energy savings

Jacuzzi® baths employ innovative and cutting edge insulation technologies and components, the best on the market. These help to maintain internal heat more efficiently, significantly reducing energetic expenditure.

9. The best partners

To achieve maximum quality Jacuzzi® has the best professionals and suppliers. It is also a leader as a result of choosing the best partnerships in all the areas related to the creation of its products for hydrotherapy, form materials and planning, to design and marketing.

10. We're here for you

After entering the showroom, looking at the choice of Jacuzzi® baths or showers, through to installation and 10 or 20 years later, our customers will know that they have chosen the best. Jacuzzi® offers a manufacturer's warranty on all its products, but also offers great post installation customer service. Our dealers and after sales team are on hand to resolve any problems. Life is easier with the Jacuzzi® whirlpool, and also with our support service.

Jacuzzi® , much more than just a name

Life flows like water, the priority of Jacuzzi® is to restore rhythm and balance. A demanding job, playing sports or just a busy life, create the constant need for a revitalising, rewarding, relaxing and rejuvenating ritual. For over 50 years we have worked with this awareness, with the aim of creating new technologies that can make the Jacuzzi® whirlpool experience unforgettable.

Something to experience with the body and the senses, inspired by the benefits to the body and mind in their broadest sense. As a result, today the name Jacuzzi® is associated with four values that represent the four basic levels of wellness. Every Jacuzzi® product is based on these values, in a synthesis capable of improving the lives of its customers.

design: essential element of refined aesthetics and maximum functionality.

health: reflects the attention to the health of body and soul.

performance: generated from technological research that provides the best results.

pleasure: represents the enjoyment and the pleasure of being satisfied with life.

The scientific basis behind Jacuzzi® wellness

Everyone today talks about the whirlpool bath, most have one at home, but in the market and in the world of hydromassage advertising, information is virtually absent on the proper use of the applications and the possible therapeutic indications, as well as the reasons that lead hydromassage products to being linked to the concept of wellness. Jacuzzi® wants to promote a culture of bath and shower hydrotherapy, of the sauna and of the steam bath. For this reason an in-depth and focused medical study has been carried out, which Jacuzzi has turned into a project on communication and scientific discovery and into a publication entitled “The new form of wellness”.

The new form of wellness

The book on hydrotherapy in general and in particular on hydromassage published by Jacuzzi®, was produced under the supervision of Prof. Umberto Solimene, Chairman of the Association and the Head of the Department of Medical Therapy and Spa Medicine at the University of Milan and Prof. Arsenio Veicsteinas, Deputy Chairman of the European Association of Medical Welfare and Dean of the Faculty of Human Movement Science at the University of Milan, its contents coincide with the guiding principles of Jacuzzi® scientific and technological research and underpin the development of all its products. We present a summary as an introduction to the world of Jacuzzi® hydromassage.

Hydrotherapy

Hydrotherapy uses showers and bathrooms completely or partially to heat or refresh the body. Water, at certain temperatures, in the form of steam or under the pressure of a jet, can relieve muscle tension produced by stress and anxiety. Hot

water is used in physical therapy to accelerate muscle recovery after injuries and relieve pain. The targeted jets of water (such as those caused by Jacuzzi® nozzles inclined at 30°) generate a deep massage through relaxing micro-bubbles and offer different types of hydrotherapy massage to improve circulation and promote the release of endorphins.

Hydromassage

Created from the combination of water, heat and air. The water reduces the weight of the body mass by 90%, loosening the tension of muscles and joints. The heat dilates blood vessels improving the flow of blood. The air released from the jets as well as relaxing the muscles relieves nervous pressure. Hydromassage can be done with thermal waters, but not necessarily; the principle of action, in fact, does not rely so much on the quality of the water, as its temperature and its movement. Its aim is to awaken the natural self-healing mechanisms of the body. In fact, the thermal stimulus is the main factor of hydrotherapy: a first reaction, which occurs at the skin level, is followed by a second that reaches the internal bodily tissues, connected to the surface through the nerve pathways. Acting on the local concentration of blood, it is possible to put the body area to be treated into a state of equilibrium.

Shower and steam bath

A shower is conducive to a good mood thanks to its invigorating antidepressant effect. It is useful in the treatment of skin imperfections such as orange peel skin and cellulite because the water jet ensures nerve stimulation which affects the tissue. There are various types of shower: filiform, the most commonly used with the jet perpendicular to the body from above; Scottish, alternating jets of water from 26° to 40° C; vertical jets that target the various parts of the body. The steam bath consists of a bath of dry steam in an environment saturated with hot air at 40-50° with humidity of 100%. The steam can also be combined with chromotherapy and aromatherapy. There are numerous benefits, including improved blood and lymphatic circulation, it favours oxygenation and purification through the elimination of toxins and helps respiratory, liver, kidney and intestine functions work at their best.

The new form of wellness, the Jacuzzi® book available on request.

Your Jacuzzi® world

You deserve the best

If you have decided to buy a hydromassage bath or a steam and shower cabin, then it has to be a Jacuzzi®. You do not become the most famous bathroom and hot tub brand in the world for nothing. The prestige and exclusivity of each of our models are the result of years and years of research and experience. The life of our brand has been, and always will be, entirely dedicated to improving, perfecting, updating and making our invention available to everyone.

To relax, revitalise, rejuvenate and recharge your batteries

The patented Jacuzzi® hydromassage baths and showers are a wellness treatment in every respect. Submitting all the muscle groups and joints to the beneficial pressure of the jets, is the guarantee of a wellness experience that improves the quality of life.

Your oasis of wellness

A whirlpool bath, or a Jacuzzi® steam and shower cabin, becomes the centre of the domestic space dedicated to self-care. A place where you can forget the hectic nature of everyday life, where the bathing ritual is enriched by value and pleasure, where technology combines with design to meet your needs, whatever they are, and always offer you the best.

Feel good together

The harmonising effect of hydrotherapy can be shared and become a healthy habit for parents and children. Regularly enjoying the Jacuzzi® hydromassage experience helps to better face the commitments of the day and, to some extent, facilitate relationships.

Wellness that is environmentally friendly

- The facilities where the baths and showers are manufactured are modern installations equipped with regenerative thermal systems that are active throughout all the stages of production, a practice that neutralises 99% of the gas released into the air.
- In our factories a system has been designed that is able to recycle all the water used during the testing phase of the baths.
- The waste from the acrylic parts are pulverised and recycled, for example in products for industrial cleaning.
- The electronic components are lead-free and non-toxic. So they can be disposed of safely once they have completed their life cycle.

The essence of the strength of Jacuzzi® lies in its integrity. Choosing a Jacuzzi® bath or shower is to opt for a product that respects the environmental dynamics of our planet, here are some examples:

- the wood used for the finish comes from companies that adhere to environmental control systems.
- the coating materials of our housings are manufactured with at least 80% recycled plastic.
- the LEDs used consume about 8% of the total energy that an incandescent bulb with the same characteristics would consume.

baths

Hydromassage: domestic hydrotherapy

How it works

Hydromassage is a form of “external crenotherapy”. It is carried out with special jets of water issued at certain pressures. The jets are oriented in a centripetal direction, i.e. from the sole of the foot to the chest, to facilitate the circulation of the blood return. This centrality of the water jets in therapeutic terms explains why their orientation is one of the key factors to the Jacuzzi® hydromassage.

In fact, hydromassage baths are designed with particular attention to the positioning of the jets, which should not be randomly placed but specifically considered together with the internal ergonomics of the bath, to maximise the effects of the hydrotherapy. The design of the bath, a key element of a good hydromassage, is also the result of careful research. Jacuzzi® baths are deeper than traditional baths, with ergonomic bottoms and sides that better accommodate all body shapes and allow proper immersion of the body and better water circulation. The Jacuzzi® hydromassage is based on the physical principle of the Venturi effect, which creates a perfect mixture of air and water. For hydromassage to be done properly, the jets must have an important characteristic: to be inclined at 30° to allow for a proper massage active from the surface to the core (the perpendicular jets may be too energetic) and to be adjustable in any direction, to ensure maximum personalisation.

The authentic Jacuzzi® hydromassage has jets inclined at 30°, which can be positioned in any direction.

Who can benefit from it

The therapeutic properties of the hot water in the hydromassage bath tubs are suitable for every body type, size and level of stress. Some need a powerful jet to loosen the knots of the muscle mass. Others simply require a cradle of warm soothing water. But the beneficial effects of hydrotherapy can do more: it is argued that it manages to relieve the symptoms of arthritis, while providing temporary relief from chronic pain and promoting relaxation.

When precautions are necessary with hydromassage

As with all types of outpatient care, hydromassage is contraindicated in cases of serious illness or the acute phase of disease. It is not recommended in cases of acute and chronic respiratory failure and also with some skin disorders. Finally, in terms of cardiac circulation, it is better not to have a hydromassage if you are undergoing pathologies or deficits. In any event, it is always advisable to consult your doctor.

The temperature

Water is considered hot if it is above the body temperature (37°C); at 40°C it is very hot and over 46°C it can not be endured for more than a few seconds. A hot hydromassage is exhilarating at first, but can become very “stressful” for the body. Therefore, it is essential to control the temperature of the water in relation to the duration of the bath. As a general rule: the higher the water temperature, the shorter the hydromassage should be, as suggested by the table. To accustom the body you could start with 10 minutes until you reach the optimal duration, which should be tailored to the individual. Before the hydromassage, at least once a month, it is advisable to scrub the body to free the skin from dead cells.

Table of temperature/hydromassage duration

34°C - 36°C: 20 minutes
36°C - 38°C: 15 minutes
38°C - 40°C: 10 minutes

Jacuzzi® jets give a powerful and targeted massage

Inspired by you and targeted where it matters most.

The Jacuzzi® jets are the result of 50 years of research and innovations: in synergy with the powerful hydromassage pump, releasing a mixture of air and water which is highly effective on the vital points of the body. Inclined at 30° and adjustable in any direction, they hit all the muscle groups of the body in the correct direction. The plantar and lateral jets stimulate the whole body, eliminating fatigue and tension, while the rotating dorsal microjets massage the entire back.

SHOULDERS

The build-up of tension in your shoulders, often leave you feeling of discomfort and muscle stiffness. The Jacuzzi® jets installed at the upper part of the baths and shower columns, work specifically on these muscles, relaxing them, and releasing fatigue and tension.

BACK

Sitting in the same position for a long time at work, carrying loads, fatigue or walking too much, can create back pains which can be strong and accumulate stress that also affects posture. The rotating lumbar jets and in particular those that are inspired by shiatsu massage apply a constant and continuous pressure in this very important area of the body, relaxing, toning and relieving pain.

The seven golden rules when choosing a good whirlpool

1. location and type of hydromassage jets
2. flow regulation
3. directionality of jets
4. uniform water/air mix
5. internal ergonomics of the bath
6. ideal temperature
7. the experience and reliability of the manufacturer

AIR MASSAGE

The skin also wants to be involved

In addition to being extremely pleasant and gentle on the body, the blowing of air contributes to the oxygenation of the water, revitalising skin cells and promoting the radiance of the skin.

LOINS

All the pressure, which is sometimes unbearable, accumulating on a daily basis in the lower part of the pelvis is alleviated and released in the water thanks to the action of a single large jet positioned in the centre of the Jacuzzi® hydromassage bath, providing immediate relief and rest.

HIPS - THIGHS - KNEES

This area of the body is very important for circulation, often with our posture, the fact of often working sat down for long periods, slows the circulation, creating tension and swelling. Jacuzzi® has positioned the jets at just the right height to stimulate the circulation of blood and relieve discomfort.

LEGS - FEET

It is difficult to imagine the levels of stress, load and tension our feet, ankles and calves are subjected to every day. Every step, every flight of stairs, all the loads we carry, put pressure on this area of our body. Moreover, the soles of the feet are connected, by extension, to the entire body. The two Jacuzzi® jets positioned at the height of the feet, not only restore strength and relieve fatigue, but reactivate the blood flow and stimulate a beneficial flow of energy throughout the body.

Choose your Jacuzzi® whirlpool bath

CLASSIC JACUZZI MASSAGE

Original patented wellness. The timeless Jacuzzi® whirlpool technology, with jets inclined at 30° and adjustable in any direction, which stimulate and tone the entire body including the legs, down to the soles of the feet. A progressively intense action, in a centripetal direction, which involves all the muscle groups, releasing, energising and finally relaxing the body.

AQUASYSTEM

The soul is included in the hydromassage. Thanks to exclusive Jacuzzi® technology, the hydromassage has levels of customisation never seen before: just the gentle touch of a finger will activate the preferred program. **SILENCE**, relaxation is complete, the muscles release all the tension, in a delicate, gentle and silent way. **BREATH**, hydromassage at a slow and harmonious pace which puts you in sync with your breathing, for unimaginable, deep psychological wellness. **RENEW**, to renew the vital tone, reinvigorate your body, clear your thoughts, drive away contractures and stiffness: this is the hydromassage that varies intensity in a gradual sequence to provide toning and relaxation. **DREAM**, an extraordinary mix of gentleness and toning, in a dream sequence which in a gradual and cyclical way changes from a light caress of water to a beneficial embrace.

SHIATSU

Hydromassage on the meridians of the body. An exclusive hydromassage system, patented by Jacuzzi®, provided with two parallel rows of 32 jets, placed just in correspondence of the “vu” meridian which, according to Chinese medicine, sends energy from the back to the whole body. The microjets of water are orientated so as to hit and activate all the cervical, dorsal and lumbar points, with the same gradual pressure as the fingers of a masseur. The pressure is governed by a complex electro-hydraulic system that produces a real flow of water, even a progressive “rolling” of pressures: which is exactly what happens with Shiatsu. The treatment can be performed in two ways: from the bottom upwards (toning) and from top downwards (relaxing).

AIR

Lightness and fun in the whirlpool. A vitalizing and energizing formula: thousands of fine bubbles that caress the body giving it energy and vitality. Due to the location of the jets on the bottom of the bath it is possible.

Accessories to wellness

REMOTE CONTROL

With just the click of a button. The remote control for the Jacuzzi® whirlpool bath is a sophisticated electronics management centre, which works in a simple and intuitive way. Result of the most advanced Jacuzzi® technology, it is possible to turn on the bath at a distance, prepare the hydromassage, choose programs, methods and intensity, include or exclude the jets.

LIGHTING - CROMODREAM®

The eye also wants its share of wellness. Our senses are not only physical, but also emotional. The Jacuzzi® lighting systems make the hydromassage moment more emotional, especially in the dark, illuminating the water. The Cromodream® function, together with the hydromassage, provides an authentic chromotherapy session in accordance with the mood and the need of the moment, for total wellness that involves the body, the senses and the mind.

HEATER

Like the spa. The time and the quality of every experience in your whirlpool bath can be enhanced by choosing our heating system. Thanks to the heater, available as optional or as standard depending on the models, the water temperature is kept constant for the entire duration of the bath, recreating the true feeling of the spa.

SWITCH

Control of the jets is in your hands. This is what really makes the Jacuzzi® hydromassage unique. With our hydromassage system there is nothing standard: everybody is different, as such the needs and conditions are different. The Switch function allows you to control which jets to activate, on which muscle groups to focus, passing easily from one group of jets to the other.

HEADREST

Head and neck, the focus of wellness. Jacuzzi® comfort for all the senses and taking into account every detail. Even the position of the neck is important to enjoy a perfect hydromassage session. The head must be perfectly relaxed: this is why Technogel® or EVA headrests are the ideal solution. These soft, antibacterial materials that hold their shape are a luxury must-have for total wellness.

COLOURS

The nuances of design. Even the colour becomes an element to personalise your Jacuzzi® bath, matching the bathroom, the interior decoration and your personal taste.

TOP

Elegance, the centre of attention. The sophistication and refinement of the Jacuzzi® design is also found in the details and can be harmonised with any environment. The ergonomic shape of the baths are enhanced by the possibility of luxurious customisations with the highest quality materials. It is possible to choose from Teak or Wengè wood finishes, white Carrara marble or Absolute Black granite, Medea stone and the exclusive and prestigious Corian®, in which an attractive luminous frame is inserted.

PANELS

Prestigious materials. Jacuzzi® comfort for all the senses and taking into account every detail. The whirlpool baths are beautiful and elegant and, depending on the model, are finished with panelling made from exclusive materials.

The unique nature of the Jacuzzi® design

Auto draining system

The hydraulic system of the Jacuzzi® whirlpool bath has an inclination designed to prevent the stagnation of water, in order to maintain optimal hygiene.

The jets and the power

The pump drives the hydromassage system and must have sufficient power to ensure continuous water circulation in an energetic and controlled way. This is why the Jacuzzi® jets are so powerful and beneficial.

Dry Run Protection

A special device that protects the hydraulic system prevents the pump from operating when the bath is empty or has an insufficient water level. An additional guarantee of durability and reliability for Jacuzzi® whirlpool baths.

Reinforced structure

The shell of Jacuzzi® bath is protected by a uniform layer of fibreglass, applied over the entire surface. The bottom is further reinforced by a chipboard panel that is 2 cm thick, firmly anchored in a sturdy metal frame.

Ideal depth

The internal depth of the bath is essential to ensure the proper execution of the hydromassage, which is why Jacuzzi® baths, thanks to clever ergonomics, have the ideal depth to immerse the body completely without using excessive amounts of water.

Sanitising system

An optional system with electronic controls integrated into the control panel. To activate it, press the appropriate button for 4 seconds, a precautionary measure to prevent accidental starting of the sanitisation cycle. The process takes 10 minutes, is fully automatic and uses a liquid disinfectant.

Revive the body and spirit

The essence of the Aquasoul family is to offer an experience of complete renewal, relaxation and rejuvenation. The heart of Aquasoul is an exclusive technology that allows you to customise the hydromassage as you want, in every detail, depending on the mood of the moment.

Only the people who invented the hydromassage could reinvent it

Aquasystem® is the new Jacuzzi® revolution: with a simple press of a button on the remote control, you can choose from four types of wellness – Silence, Breath, Renew, Dream – in tune with your mood, according to the needs of every single moment.

Accommodating the body completely

By precisely studying the ergonomics and internal depth, Aquasoul baths allow you to immerse yourself in the water up to your shoulders, optimising the effects of the Jacuzzi® hydromassage. Every detail is taken care of and the exquisite materials, such as the Technogel® headrest, a material that is very soft, are welcoming and comfortable, with antibacterial properties.

The perfect marriage of aesthetics and functionality

In addition to offering total relaxation and comfort beyond imagination, all the Aquasoul models have luxurious details, refined lines and rounded shapes. Operation and the choice of functions are immediate, performed by the elegant electronic remote control which is activated with the touch of a finger. Particularly striking is the effect created by the Led floor lighting: the bath seems to rise from the ground, magically as if suspended over the light.

Exclusivity and refinement for wellness

Unique solutions and exquisite materials: Aura offers, in an exceptional frame, the maximum in Jacuzzi® wellness. The seat is equipped with the classic Jacuzzi® hydromassage and also with the lumbar hydromassage. Its adjustable jets invigorate, revitalise, releasing tensions and contractures, promoting circulation.

Complete personalisation

This is a range of baths with an original look, which is versatile and eclectic, fitting perfectly into any environment thanks to different versions and the possibility to choose the finish of the edge: Wenge, Teak, White Carrara marble, Absolute Black granite and Medea Stone.

Absolute comfort

The headrest made of EVA, a soft, non-toxic and antibacterial material, with its original design is studied to fully accommodate the neck, even in “total immersion”, ensuring maximum comfort and stimulating the vital areas of the neck and shoulders. Everything in Aura is elegant, the draining command is hidden under the rim, the hand shower is removable and the electronic control panel manages all the functions.

Immerse yourself in light

The underwater lighting creates an exciting atmosphere and an intimate and reinvigorating experience. The heater keeps the water temperature constant, ensuring maximum comfort. The exclusive system of Jacuzzi® sanitation, included in the top versions, allows correct and constant water hygiene.

aura corian®

aura plus corian®

aura uno corian®

aura corner 160 corian®

aura corner 140 corian®

A unique material

Corian® is a material patented by DuPont™ with extraordinary aesthetic characteristics. Resistant to light, heat, water and any other pressures, it remains unchanged over time and combines extraordinary hardness, similar to stone, with great flexibility and versatility of design.

All the characteristics of Aura

Every detail of Aura Corian® is carefully considered: from the original design of the headrest, to the draining command hidden under the rim, to the remote control that manages all the functions. The mechanic or electronic tapware has a removable hand shower and a fill spout. The handy diverter allows you to choose the action of the nozzles for the classic hydromassage or the dorsal hydromassage with three rotating nozzles. The underwater light creates a spectacular effect during the hydromassage and the remote control allows you to access all the functions easily and immediately.

Prestige to any room

The Corian® gives a special feeling to the unmistakable volumes of Aura. Its translucency brings out the edge of the bath and thanks to the spectacular LED floor lights, it creates a very exciting suspended effect.

The maximum in Jacuzzi® wellness

The seat is also equipped with lumbar hydromassage. Its directable jets invigorate, revitalise, releasing tensions and contractures, promoting circulation, while the underwater lighting creates an exciting atmosphere.

j-sha

j-sha mi
j-sha mi corner

Balance and energy

The Chinese discovered that the vital energy or Qi flows along channels called meridians. Shiatsu is a special massage that stimulates the meridians with pressure of the fingers, releasing fatigue and relieving pain according to the principles of acupuncture. Based on this holistic view of wellness Jacuzzi® has created J-Sha.

The first and only Shiatsu hydromassage in water

The unique J-Sha hydromassage system has a parallel row of 32 jets on the side of the bath in correspondence with the “vu” meridian. Coming out of these in succession are microjets of water orientated so as to reach all of the dorsal and lumbar points of the meridian, with the same gradual pressure as the fingers of a masseur. The pressure is governed by a complex electro-hydraulic system that produces a real flow of water, working as a progressive “rolling” of pressures: which is exactly what happens with Shiatsu.

A tailored treatment

The deep ergonomics of J-sha enables everyone to find their ideal position, sliding forward or backward. The water level is always perfectly maintained thanks to a sophisticated hydraulic system and in this way it is always possible to perform the shiatsu massage properly. J-sha allows you to choose from 3 pre-set programs: BACK/JET (shiatsu), BODY/JET (classic hydromassage) and MIX (mixed). The treatment can be performed in two ways: from the bottom upwards (toning) and from top downwards (relaxing). These programs are further customized by manually using the remote control.

A beautiful experience in every sense

The underwater light helps to make the environment more harmonious, giving the emotion of light to the shiatsu hydromassage moment. By simply using the remote control it is possible to activate all the J-sha functions: hydromassage, underwater lighting, the sanitisation system and the radio.

nova

nova
nova corner

The perfection of the circle for all-round wellness

A true oasis of relaxation and beauty, protagonist of the bathroom, which becomes unique. Its soft and welcoming shape, its generous size, blend nature, technology and architecture.

Maximum comfort for head and neck

All Nova baths are fitted with an exclusive headrest, made from exquisite material. This attractive combination of design and ergonomics is designed to fully accommodate the neck and give the bath a perfect aesthetic detail, which harmonises well with its shape and its large size. The adjustable position of the headrest makes the bath even more versatile to use.

Every feature is exquisite

Everything in Nova speaks the Jacuzzi® language of beauty and self-care. From the optional underwater light, to the tap units, to the removable hand shower and to the frame which can be customised with exquisite materials: Wenge, Teak, White Carrara marble, Absolute Black granite and Medea Stone.

A remote control for wellness

Nova offers maximum performance with maximum ease. A simple touch of the remote control activates all its functions, from the optional heater, to the sanitising system as standard, and the exclusive Aquasystem technology, to customise the hydromassage at any time based on the wellness experience you require.

opalia

opalia

opalia wood/stone

The softness of design

This is a line of whirlpool baths that tells a unique story, both in terms of its style and its technology. Every detail of the Opalia range is refined, the finish is exquisite, the hydromassage comes from the powerful Jacuzzi® jets positioned to envelop the whole body in a beneficial embrace.

A visual experience too

During the hydromassage, the water is illuminated! The underwater light, provided as standard with the Wood and Stone versions, makes the relaxation more complete and the self-care more emotional. The sanitising system, which comes as standard for some versions, provides the security of complete hygiene.

Functionality and technology at your fingertips

The electronic control panel gives you control over the hydromassage programs in a simple and intuitive way. The dual ergonomic headrest blends in with the aesthetics of Opalia and offers optimal comfort. It comes as standard with the Wood and Stone versions.

Aesthetics come as standard

The tapware unit matches the aesthetic line of Opalia, as well as the finishing of the edge, customisable in Teak, Wenge, White Carrara marble, Absolute Black granite and Medea stone.

Contemporary simplicity

The Jacuzzi® Sharp line eliminates the superfluous to favour function and ergonomics, it makes the most of interior spaces for maximum comfort and with its simple and squared shapes fits perfectly into any environment.

Hydromassage and character

Sharp is available with the classic Jacuzzi® hydromassage and in the Top versions, with the Aquasystem® technology, to wrap the body in the embrace of an effective and deep hydromassage, offering maximum wellness. The linear and minimalist shapes, the clean design and the long seats are the stars of this line with innovative aesthetics.

Electronics and multi-sensory experience

The remote control operates all the Sharp functions. Every detail is taken care of, from the ergonomic Technogel® headrest, to the refinement of the underwater light, and the heater (Top and Top AQS versions).

Wellness in various dimensions

Sharp exists in different versions and different models to meet all your needs. Its simple squared lines, flexible installation and panelling available in various finishes are the product of an absolute synthesis of form.

energy 170

Hydromassage is for everyone!

Energy is a small revolution in the world of domestic hydromassage. A new concept of bath from the balanced, essential, minimal and timeless forms which matches any type of furnishing and is accessible to everyone thanks to attractive prices, while maintaining the prestige and exclusivity that have made the Jacuzzi® brand famous worldwide.

A perfect synthesis of uniqueness of the shape and functionality

Energy offers everyone the perfect experience of the authentic, deep, beneficial Jacuzzi® hydromassage for areas of the body, aimed at the back, legs and feet. The side jets are adjustable through 30° to get the maximum benefit. The internal comfort is the result of clever ergonomics, the headrest is comfortable and welcoming.

Stylish details

The controls can be activated by touching the user-friendly symbols that can be easily identified on the edge of the bath. The tapware is compact and minimalist and includes a hand shower. The optional sanitising system ensures constant hygiene while the Dry-run protection system prevents operation when the bath is empty.

The light is included

In the version provided with the Cromodream® option, Energy allows you to enjoy, together with the hydromassage, an exciting session of chromotherapy. This function also works as a courtesy light when the bath is empty. Due to the capacity and the depth of the bath the feeling of warmth and relaxation is total.

JET

DUO

Feeling good can be fun

The hydromassage can be fun and can become an essential part of an enjoyable lifestyle. Young has a special style, dedicated to those who prefer a dynamic, active, positive way of life. Its design is in line with modern furnishing trends.

Utmost versatility and adaptability

Lots of models and many ideas to offer the ideal solution and personalise even the smallest rooms with the technology and prestige of Jacuzzi® for the domestic hydromassage.

Focused well-being

The design of the Young bath jets blends in with the aesthetic lines of the collection. Smooth, rounded and adjustable for a focused, customised treatment directed to the tightest and most aching muscle groups and to the most important spots of the lymphatic system.

Touch and go

The Young baths are provided with an electronic control panel called Lumina. Its name means that, once activated, a touch of the finger is all it takes to select the duration and intensity of the hydromassage and to make all the bath functions available.

Classic design and balance of shapes and volumes
Elegant synthesis of unique design and technology for the Jacuzzi® hydromassage, the baths from the Classic line offer top performance and unique aesthetics.

A classic for wellness

All equipped with the classic Jacuzzi® hydromassage, the Classic baths offer a targeted and deep treatment that involves all the muscles of the body. A complete hydromassage to enjoy in total relaxation thanks to the comfort of the ergonomic headrest.

The secret is in the jets

In all the models, the jets are located in the dorsal, lumbar and side area in order to cover, with their powerful jets, the shoulders, spine, back, loins and also the full length of the legs, for a total benefit.

Electronics made easy

Thanks to the electronic control panel, all the functions of the Classic baths can be activated with a simple and intuitive touch with the finger. The water-fan spout and the exclusive tapware unit complete the standard equipment.

Feel good and cheerful

The secret of health, but also good mood and relaxation, can be found in water. Jacuzzi® air baths with their thousand healthy bubbles offer a unique experience that is good for the body and regenerates the tissue giving tone and firmness.

The lightness of the technology

The airpool technology is activated by the blowers, which are positioned across the bottom of the bath and blow vigorously into the water, creating a unique moment dedicated to hydro-relax.

The skin also wants to be involved

In addition to being extremely pleasant and gentle on the body, the blowing of air contributes to the oxygenation of the water, revitalising skin cells and promoting the radiance of the skin.

moove

corner/built-in/wall/niche

Cutting-edge design

Moove is a very refined bath with a unique shape that not only welcomes your body but also satisfies your idea of beauty. Its ergonomic depth is ideal for comfort and relaxation.

A touch of air on the matter

Beauty benefits from air jets that move the water in the direction of your wellness, in a creation that represents the pinnacle of Jacuzzi® design through the use of Techstone® which gives the impression that the water is vibrating for comfort and relaxation.

A synaesthetic concept of wellness

The exclusive material used to make Moove delivers an experience that involves all the senses. Its wavy surface looks as if it vibrates as the water moves and blends with the pleasant feel of the smooth surface.

non-jetted baths

The exclusivity of Jacuzzi®, also without hydromassage. Comfort, character, cutting-edge design, for refined aesthetics that personalises any environment and allows you to enjoy the bath experience in an exquisite way. If you want to immerse yourself in the world of Jacuzzi® emotions, choose between the models that may become the centre of your moments for relaxation. Some are made without hydromassage, Jacuzzi® creations with unique design and unique style. Other models are from the most prestigious collections in the non-jetted version, to provide you with the most exclusive materials such as Techstone®, marble or the warmer essences of Teak or Wenge wood.

A new concept of bathtub

Jacuzzi® offers a range of models designed to be placed in the centre of the room, an oasis of relaxation in which to rediscover the rite of water. In line with the latest trends in interior design, these bathtubs become objects of design to be displayed even inside the bedroom. And the rest dedicated to the bathroom becomes a pleasant time to experience and share in the comfort of the living area.

A large cradle of water

All the freestanding Jacuzzi® baths have a generous internal capacity to accommodate the body completely and are equipped with ergonomic backrests. These features allow you to enjoy an experience of complete abandonment by total immersion: a warm and welcoming embrace to release the tensions from a stressful day.

Classic: timeless style

Freestanding baths that have the romantic charm of a past era and, at the same time, offering all the comfort and innovation of a contemporary Jacuzzi® product. Thanks to their design that echoes the forms of the past, they fit perfectly in rooms decorated in a classic style.

Modern: an avant-garde design

Ideal for modern environments, furnished according to more contemporary styles. The lines are essential, the aesthetics minimalist and the organic and rounded forms recall natural elements.

infinito

Single version

A cradle that wraps your body in the caress of water

It is born from the earth and opens up to the sky.
Harmoniously in tune with the surrounding space.
Minimal, a concentrated blend of contemporary lines
and formal purity: a design which continues into infinity.

All the senses are involved in wellness

Infinito was born from the design by Carlo Urbinati
and Techstone®, a completely new concept, which lends
itself to a multi-sensory experience of the time devoted
to the bath.

An exclusive concept that bears the Jacuzzi® signature

An essential bath, which is unexpected, but above all
contemporary. The elegant form recalls the corolla of a
flower that is holding water.

twin versions

Energy and relaxation blend to provide the ultimate in wellness. You may love the burst of tone and energy that only a Jacuzzi® shower can offer. Similarly you may want to be embraced and soothed by a hydromassage immersed in a bath to forget the tensions of a busy life.

Water can offer the body infinite wellness experiences: Jacuzzi® has found a way to bring them all together in a single solution, from a functional, aesthetic and design point of view. The Jacuzzi® family of twin versions brings together the beneficial relaxation of a whirlpool bath and the energising dynamism of a multi-function shower enclosure, customising your bathroom and optimising space. They are the result of the latest technology to enhance every moment dedicated to self-care.

Choose your hydromassage

Vertical, dorsal, dynamic, energising, or the comfortable hydromassage bath that envelops the whole body? A few minutes to charge up before the day ahead or a long period of relaxation in anticipation of a rest? One will not have to exclude the other any more: it will be a choice that can be made every day, thanks to a series of models with contemporary design.

Multifunction shower columns

Vertical jets, raindrop shower head and hand shower combined in a selection of lines with elegantly designed baths characterised by a fluid and minimalist aesthetic effect. Depending on the model, the comfortable ergonomic headrests can be removed or integrated directly into the bath.

Wellness comes from above

A world apart

A Jacuzzi® steam and shower cabin is an extraordinary experience because it offers a feast of water that is absorbing, regenerating, all-encompassing, and gives energy and emotions. It is an authentic Jacuzzi® wellness system dedicated to the body as a whole, both physical and emotional. In fact, the hydromassage showers are a world apart: they combine the beneficial effects of hydrotherapy with the dynamism of modern life.

Feel good every day

The shower is the daily act par excellence: Jacuzzi® has made a ritual of wellness. Simply by touching the control panel, it is possible to open a world of functions, from the simple to the more technological, accompanying the body to discover excellent psycho-physical fitness.

Pleasure, innovation, prestige and intimacy

Entering a Jacuzzi® shower is equivalent to choosing how you want to feel good every day. Are you looking for the vitality of a waterfall that tones the shoulders and chest? Or the regenerating warmth of a steam room with aromatherapy? Or a complete hydromassage with the Cromodream® system, which together with the benefits of the water, provides the body with real showers of colour.

The shower for hydrotherapy

Functionality and wellness

While conducting research for “A new form of wellness”, produced under the supervision of Prof. Umberto Solimene and Prof. Arsenio Veicsteinas, collaborators at the European Association of Medical Welfare, it has been shown that the shower constitutes an external crenotherapy activity that can be carried out with both water from the mains and with thermal water. Like other types of treatment it can be carried out at different temperatures, hot or cold, with alternating temperatures in sequence and different pressures of water. It can be total body, ensuring a stimulus to the body, or local, bringing direct effects to the treated area.

An undisputed fact is that the shower has hydrotherapy functions, as such many physiological benefits are recognised. Its main action is directed at the cardiovascular and nervous system: the warm water jets directed to different parts of the body have important effects on wellness. It is now shown that, in addition to stimulating circulation and muscle function, the shower can also have beneficial effects on the internal organs and the emotional sphere.

Shower and hydromassage

Targeted and effective verticality.

The Jacuzzi® shower jets are the result of the most extensive hydromassage experience in the world and over 50 years of research and innovation. Positioned so as to generate different types of hydromassage, they hit all the muscle groups of the body in the correct direction. In this way they stimulate the body, eliminating fatigue and tension.

The Enerjet system by Jacuzzi®

Jacuzzi® has reinvented the hydromassage and adapted it for the shower. The technology for wellness knows no boundaries and the secret of vitality is contained in the latest generation of Enerjet water microjets: a source of energy and freshness that knows no comparison. They point directly at the areas of the body that need the greatest attention, are adjustable for water flow and pressure intensity, and can be directed as desired.

Scottish shower

Rapid alternation of warm and cold water, an ancient but sophisticated energising system, ideal for a stronger physical condition. An authentic blessing that revitalises the skin, tones the muscles and stimulates the immune system. It can also be activated with the hand shower function, vertical hydromassage and back hydromassage.

Vertical hydromassage

The true, invigorating concentration of energy available in 8, 12 or 16 jets, regenerates the body's natural vitality. The build-up of tension in the shoulders and muscular rigidity disappears.

Back hydromassage

A massage with water fingers, a remedy for reinvigorating the dorsal area, and in particular the back, and providing harmony and deep relaxation.

Shiatsu hydromassage

Exclusive to Jacuzzi® which, thanks to jets that run along the back, operates a constant pressure in the vicinity of the meridians of the body, with a relaxing, toning, anti-pain effect.

Lumbar hydromassage

Ideal for toning hips and buttocks, a real blessing to keep your body at its best, thanks to the beneficial and vigorous jets specifically designed to alleviate the tension and fatigue of muscles located in the lumbar region.

steam and shower cabins

A Jacuzzi® steam and shower cabin is the gateway to a world of wellness. A shell of light and technology in which to seek refuge and enjoy an intimate experience of care and relaxation. Each cabin from our collections is a prestigious place where every aspect is taken care of and every feature is important and studied in minute detail. Because it has to deal with your needs and provide you with the ultimate in pleasure, technology, design and performance.

Trying a Jacuzzi® steam and shower cabin is an exciting experience, indulging in the hydromassage and the many functions it contains, invigorates your body and takes it to another dimension.

The fourth dimension of wellness

Multifunctionality

The Jacuzzi® steam and shower cabin is not an alternative to the hydromassage bath, but a real way of thinking about daily wellness and enjoying an unparalleled experience. Just select on the simple and intuitive control panel the function you desire and activate it: the choice is extensive.

Vertical hydromassage

Jacuzzi® takes the benefits of an authentic and deep hydromassage to the shower cabin. Simply choose from the control panel the intensity of the adjustable jets to target the more tense and tired muscles and add to the pleasure of the shower with the experience of complete wellness and rejuvenation.

Cascade shower

A really exciting way to shower, which gives complete, deep and lasting wellness as it exercises a pleasant massage on the shoulders. The fresh and vital action of the water, which flows in a continuous and voluminous stream, working on the muscles suffering from greatest stress, giving an unforgettable feeling of relaxation.

Cascade Power Fall

An extraordinary function, a real unmatched wave of energy and vitality: a cascade of 170 litres of water per minute to instantly relieve all the tension and tiredness accumulated during the day.

Steam bath and aromatherapy

A beneficial cloud of steam envelops the body from head to toe, deeply purifies the skin and helps the body to rid itself of toxins, strengthening the body's natural defences. The discovery of the benefits of the steam bath is ancient. Today, this particular form of hydrotherapy has assumed the value of an authentic wellness ritual. Inside the steam cabin, thanks to the fan fitted as standard, the steam bath has a constant temperature and humidity. The boiler is more powerful, thanks to the technology developed by Jacuzzi®, it is placed inside the walls and the delivery takes place through a nozzle located under the seat. In this way the steam rises naturally and uniformly upwards. Furthermore, thanks to a special fragrance diffuser, in which you can add essential oils, it is possible, during the steam bath, to perform an authentic aromatherapy treatment. Depending on the properties of the essences used, it is ideal to relax, rejuvenate, calm, restore respiratory function when it is congested or just be enveloped by your favoured essences.

Functions and emotions

Cromodream®

A completely new rain of stimuli and sensations, thanks to the exclusive Jacuzzi® patent, acts as a tonic to the mood and nervous system. Cromodream® is a flow of light and colour that surrounds the body together with the water of the shower or the steam from the steam bath. The result of Jacuzzi® research, aimed at the discovery of new frontiers of wellness, provides 4 programs to be chosen from based on the needs of the moment: Sun, Relax, Energy and Dream.

SUN

A sunny atmosphere, a combination of warm colours - yellow-orange-white - interspersed with sequences of blue and violet.

RELAX

To promote relaxation through the combination, in a soothing sequence, of the four colours: light blue-orange-blue-white.

ENERGY

Nothing is more vital than red and orange, alive and alight from the power of the white light they alternate with.

DREAM

To enjoy the full range of colours, from the warmest to the most stimulating tones. A kaleidoscope of white-blue-orange-yellow-green-magenta.

Crystal Clear by Jacuzzi®

The walls of the shower cabin, the transparent and glass surfaces, are pre-treated with Crystal Clear water-repellent and anti-lime scale finish. This system preserves the beauty of all the surfaces, making cleaning easy, and ensuring superb brightness over time.

Hi-Fi System

Do you like singing in the shower, listening to the news, or maybe following the morning programme on your favourite radio station? All this is possible by just turning on the Radio Hi-Fi function.

frame 100

The new frame of wellness

Minimalist lines and high levels of wellness for the Jacuzzi® steam and shower cabin which is the perfect synthesis between functionality and aesthetics. Jacuzzi® technology is expressed in a contemporary design, the result is a new concept that frames the experience of wellness as a work of art. Available in sizes 100x75, 120x80 and now also in the double module: FRAME IN2

Luxury fittings, minimal aesthetic

The clean lines characterise Frame which presents itself as a comfortable environment where you can experience all the functions dedicated to wellness: raindrop shower, shower with pulsed and sprayed water, energising cascade, shower in colours with preset Cromodream® cycles, steam bath and aromatherapy.

The first shiatsu hydromassage in a shower

With Frame, Jacuzzi® inserts for the first time in a shower enclosure the shiatsu hydromassage function, together with the classic vertical, back and lumbar hydromassage. In this way the space dedicated to wellness becomes a small private temple: just touch the electronic control panel to activate a unique experience, adaptable to the needs of the moment: from the search for a moment of relaxation to a real and deep hydrotherapy session.

Enter into another dimension

Frame fits seamlessly into the surrounding space thanks to the large frame that embeds the shower enclosure in any type of environment, not necessarily that of the bathroom, and perfectly symbolises the passage of a hectic and stressful life to a universe dedicated to self-care: Frame is the gateway to a small multi-sensory microcosm created to enjoy intimate moments while immersed in colours, sounds and scents. The shower tray and duckboard are made from Techstone, the handle is made of glass for maximum cleanliness and transparency and 8mm full-length glass panels are equipped with the Crystal Clear function.

The subject of design

Beauty and wellness coexist in what is one of the most extraordinary creations by Jacuzzi® produced in limited edition. The unprecedented combination of teak, glass, steel and techstone® has created a shower which is like moving to another dimension. Whatever you are looking for, by entering the Ωmega steam and shower cabin you will find it, you can relax, invigorate yourself, receive a boost of energy, release tension, wash away the tiredness.

The most beneficial of experiences

The Jacuzzi® vertical and back hydromassage involves the body throughout its entire height, stimulating all the muscle groups thanks to four directable Enerjet vertical jets. The steam generator allows you to get maximum performance from the steam bath that completes the shower moment with its purifying effect to which it is possible to combine the benefits of aromatherapy.

All the excitement of wellness

Omega allows you to choose three shower functions on the electronic control panel: pulsating, continuous and vaporised, all can be modulated in intensity according to the needs of the moment. In addition, by activating the cascade it is possible to receive a relaxing massage in the upper part of the neck and trunk. The shower cabin is available with either the seat on the right or with the seat on the left of the control panel and the shower.

Prestige in all the senses

Each shower is numbered and bears the signature of Pininfarina. The sinuous line of the seat is in perfect harmony with the innovative aesthetic lines of Omega which accommodates the body, making the shower a moment of complete comfort. The details are carefully researched, from the thermostatic mixer to the Crystal Clear treatment, to the function diverter: everything is the result of careful thought aimed at offering the most complete experience that you can have in a steam and shower cabin.

Transparent design

Agile and gentle lines, high volumes, large glass panels, high-quality materials, elegance and refinement: Mynima is the expression of a design that dedicates the art of minimalism to everyday life. The large glass screens are covered with Crystal Clear to ensure maximum transparency even after use.

Functionality and avant-garde style

The anodised aluminium column contains the commands to activate the back hydromassage, the large raindrop shower head and the steam bath. The seat is made from Techstone®, as well as the shower tray which has been lowered almost to floor level. The temperature is kept constant by the thermostatic mixer which ensures the hydromassage is performed at the optimum temperature. Mynima is also available with the glass wall.

The essence of vitality

Enerjet is the system of adjustable water microjets created from Jacuzzi® technology: an unmatched source of energy and freshness. The jets are designed to target the various muscle groups and provide a pulsating massage.

Aquafeeling Effect

Intimacy, gentleness, relaxation, wellness: the exotic atmosphere of the Tropical Shower awakens the senses, caresses the skin and, in soft flowing streams, revives the spirit. Also the functions of steam bath and aromatherapy are available.

Verticality and design

The light and agile lines, the electronic control panel, the large areas of transparent glass which, thanks to the special Crystal Clear treatment, are always perfect and easy to clean. Everything in Flexa is harmonious and functional, even the panel without visible profiles contributing to the perfect harmony between the cabin and the surrounding environment.

Total hydromassage

In the Flexa shower enclosure, the original Jacuzzi® vertical hydromassage is activated by numerous nozzles, positioned along the entire hydrocolumn with a particular sinuous design. Intense, effective, pleasant: it involves all the muscles groups of the body from the neck to the back and when the lumbar hydromassage is activated, the lower limb hydromassage is also put into action, specifically to stimulate and strengthen the calves. The effect is that of a complete hydromassage, perfectly invigorating and relaxing at the same time. Maybe to the sound of music.

More space for comfort

The unique architecture combines a large internal space to optimal architectural fitting in the bathroom. Flexa, thanks to clever ergonomics, offers great freedom of movement: indulging in a moment devoted to hydro relax is even more fun and gives psychological wellness with no restrictions.

The triumph of multifunctionality

Together with the steam bath and the Scottish shower, it is possible to activate the aromatherapy and the fantastic Cromodream®, which allows you to choose between six basic colours that are spread directly onto the body with the water jet, with a shower effect of colour which stimulates vitality and acts on psycho-physical wellness. Even the cascade Power fall has a spectacular effect and gives great benefit to all the muscles that run from the top of the head and arrive at the base of the neck.

The vitality shower

Play is the shower cabin that offers the opportunity to experience the world of the Jacuzzi® hydromassage in a dynamic, cheerful and lively way. The youthful design with a minimalist aesthetic expresses the pleasure of the most advanced performance and is supported by the best equipment and maximum installation versatility.

Vertical wellness

The original Jacuzzi® vertical hydromassage has a relaxing, invigorating and re-energising effect. It stimulates vital centres with different intensities and involves all the muscle groups from the base of the neck to the lower back, giving complete psycho-physical wellness. The system of nozzles allows the flow of water to be varied, by changing the flow and intensity. Play is also available with or without the glass wall.

The healing power of water

The cascade shower and large raindrop shower head provides the head and shoulders with beneficial pressure, ideal for releasing all the muscle tension in the neck and upper shoulders. The steam bath, combined with aromatherapy, purifies the skin and the body from toxins, strengthening the immune system, thanks to a cloud of steam that envelops the entire body.

Perfect temperature

The manual or thermostatic mixer, which blends the design with the central shower column, lets you keep the water to the preferred temperature throughout the shower.

shower space

Rooms and environments are different, like the lives that inhabit them. Jacuzzi® Shower Space offers the possibility to design and customise the intimate space dedicated to self-care. Shower Space is a fully modular system that allows you to build your own shower, choosing one element after another.

trays

Which position do you want to place your shower in? In the corner, along a wall, inset. And the shape? You can choose rounded, rectangular, square, in any size and shape, enhance it with exquisite details, elements of refined design. The trays are the first modular element used to create a Jacuzzi® Shower Space. You just have to choose the model, depending on the space available, the needs and the desires.

shower panels

They are light, compact, versatile, and offer maximum freedom of setting. Equipped with the vertical Jacuzzi® hydromassage with toning Body Jets, these panels are also fitted with a hand shower and the single command thermostatic mixer. The Jacuzzi® shower panels combine cutting-edge materials with contemporary design and are an ideal corner dedicated to hydrotherapy.

enclosures and glass panels

Jacuzzi® has created a luminous, transparent space, where wellness can be experienced without boundaries. With its sophisticated, essential design, the frames of the fittings have been reduced to a minimum, resulting in a perfect aesthetic installation. The superior-quality glass panels, are all treated with the exclusive Crystal Clear by Jacuzzi® water repellent system, which means they are easy to clean and will remain sparkling at all times, leaving them virtually invisible.

shower heads

There are many ways to classify a shower head. The shower heads for the Jacuzzi® Shower Space are not just water dispensers, but real experiences of wellness, emotional showers that involve all the senses. Suitable for both domestic and professional environments and ideal for transforming the shower space into a true paradise of relaxation and pleasure.

Compose the space dedicated to wellness

Complete freedom of choice

Tray, enclosure and shower panel. With these elements, everyone can build their own personal Shower Space in a distinctive and unique way. Jacuzzi® offers a wide range of elements that can be combined, all built with quality materials, which are reliable, durable, elegant and with unique design.

moove

shower trays

Innovated aesthetics, volumes reduced to a minimum

The result of surfaces and interior slants that collect the water and make it drain perfectly. Installed close to the floor or semi-built in. Moove trays are available in two versions: gloss and satin acrylic. They can be combined with all the Jacuzzi® shower enclosures.

shower trays

Maximum versatility

A dynamic and minimalist style, combined with a really great variety of solutions. Start! trays in acrylic are always the right choice, because they fit well in both large and small spaces. They can be finished by an exclusive platform in Teak and can be combined with all the Jacuzzi® shower enclosures.

Maximum transparency

Start! is the large range of 6 mm thick glass panels including hinged doors and walk-in versions. Their main characteristic is the maximization of transparent surfaces combined with the minimization of the frames. This gives your dedicated shower space light and unique style, enhanced by the Jacuzzi® Crystal Clear treatment.

Integrated shower system

The Start! enclosure are available with a built-in shower system with raindrop shower head, cascade shower and hand shower with three functions.

shower panels

The immediacy of the shower with the functions of hydromassage

The shower panels complete your Jacuzzi® Shower Space. Characterized by a minimalist style, offering an idea of lightness, compactness and multifunctionality. The element that makes them unique is the large shower head. They are versatile and give you the maximum freedom of installation in any environment. Equipped with vertical Jacuzzi® hydromassage with invigorating Body Jets, these panels are fitted with a hand shower. Thanks to technological and shape research and exclusive experimentation with styles and functions, Jacuzzi® combines cutting-edge materials with contemporary design, giving life to an experience that goes beyond the concept of the shower to deliver all the regeneration, creativity and fun of water.

caleidos

shower heads

A new sensory system

Caleidos is the shower system created by Jacuzzi® to provide a multi-sensory experience and total wellness. Feelings and innovative experimentation surprise and guide you along a path of relaxation and emotions. Thanks to the Jacuzzi® Cromodream® function, flowing streams of coloured light run over the body together with the water, offering a complete treatment of chromotherapy: relaxing with blue, energetic with red, balancing and harmonising with green.

The benefits of aromatherapy

With Caleidos you can experiment with the effect of three fragrances Dream, Tonic and Bouquet, emitted from the aromatherapy, which harmonise the mood, removing stress and tension. A cloud of aromatic steam, chosen according to the feelings you want to experience, envelops the body and the senses.

Professional performance

Caleidos turns the Space Shower into a paradise of wellness to be lived to the full.

To be cradled by the raindrop jet or caressed by millions of tiny drops by just selecting the vapourising option. There are two touch-screen interfaces, basic and top model, which are available for the command centre and allow the Caleidos functions to be controlled with a simple touch.

Details of style and functionality

Pure and decisive lines for a Shower Space that responds to personal desires and taste: the square aesthetic of the tap unit generates a unique effect with design of the shower head. All Caleidos shower heads have side jets and a thermostatic mixer to transform the shower moment into an authentic wellness treatment.

Jacuzzi® Service: you're in safe hands

Purchasing a Jacuzzi® product means freedom from worry, knowing that you can always count on J-Service, an organisation whose qualified team of professionals will guarantee a fully-functioning Jacuzzi® product at all times. It means having Jacuzzi® at your service. The extensive network of Jacuzzi® service centres offers a prompt after-sales service that includes customer advice, periodic maintenance and technical support when it comes to installation.

The J-Service network is responsible for the Full 24-month Warranty, at no cost to the customer. Our service centres only use original Jacuzzi® parts, and will answer for any non-conformities related to product installation. Your local Jacuzzi® authorised retailer or J-Service will be able to help you with all your questions and enquiries regarding installation, delivery, water maintenance and any technical information you require.
